ABOUT ME

Product-minded Full Stack Engineer transitioning into AI Engineering, with hands-on experience shipping enterprise software at Accenture and launching a cross-platform mobile product end-to-end. I thrive in high-growth, high-expectations environments and have owned products across the full stack — from React/React Native frontends to .NET backends and GCP infrastructure. Bilingual (English C2 / Spanish native), open to remote and hybrid roles in fintech and startups.

EXPERIENCE

Packaged App Developer Associate

Buenos Aires, Argentina

Accenture

Jan 2026 – Present

- Build and ship enterprise applications for clients across multiple industries, delivering on the full SDLC: solution design, implementation, and production handoff.
- Develop backend services in C# / .NET 8 and ASP.NET Core Web API, and integrate REST APIs consumed by React + TypeScript frontends.
- Operate in cross-functional Agile (Scrum) teams, collaborating in English with international stakeholders and contributing to technical documentation.

Founding Developer

Buenos Aires, Argentina

ReNauticos

Aug 2025 – Dec 2025

- Owned the full product pipeline for a 0-1 marketplace mobile app, taking it from technical design to live release on both Apple App Store and Google Play in 5 months as the sole engineer.
- Built a cross-platform React Native app (iOS + Android) covering authentication, navigation, service listings, and user-to-user contact flows — shipping a single codebase to two stores.
- Designed and deployed a .NET / ASP.NET Core REST API on Google Cloud Platform (Cloud Run, Cloud SQL, Cloud Storage), implementing user management, business logic, and scalable infrastructure from scratch.
- Managed the complete release lifecycle on Apple Developer Program and Google Play Console, including app review, store assets, and post-launch updates.

SKILLS

Languages & Frameworks: C#, .NET 8, ASP.NET Core, TypeScript, JavaScript, React, React Native, SQL

Cloud & Infrastructure: Google Cloud Platform (Cloud Run, Cloud SQL, Cloud Storage), REST APIs, CI/CD

AI & Tooling: LLM integration, Anthropic Claude API, prompt engineering, AI-assisted development workflows

Methodologies: Agile / Scrum, end-to-end product ownership, mobile release management (App Store, Google Play)

EDUCATION

Universidad Tecnológica Nacional (UTN)

2023 – 2024

University Technical Degree in Programming
